

KAMISETTY SAIRAM

FULL STACK LLM DEVELOPER

+91 9381847818 | kamisettsairam1@gmail.com | linkedin.com/in/sairamkamisetty | github.com/KamisettySairam1 | Hyderabad

PROFESSIONAL SUMMARY

Full Stack LLM Developer with 2+ years of experience building scalable enterprise applications, AI-driven platforms, and real-time analytics systems in the Oil & Gas domain. Skilled in Angular, TypeScript, Django, FastAPI, PostgreSQL, Redis, and Generative AI solutions. Experienced in developing enterprise dashboards, AI workflow automation systems, conversational AI platforms, and high-performance backend APIs. Strong expertise in frontend engineering, prompt engineering, real-time systems, and scalable application development.

TECHNICAL SKILLS

Frontend : Angular, TypeScript, JavaScript, React.js, HTML5, CSS3, RxJS, Bootstrap, Tailwind
Backend : Python, Django, FastAPI, REST APIs, Node.js, Java
Database & Data : PostgreSQL, Redis, Databricks SQL, SQL Optimization
AI & Automation : Generative AI, Prompt Engineering, AI Workflows, AI Agents, LLM Applications
DevOps & Tools : Git, Docker, Kubernetes, CI/CD, Postman, Swagger
Real-Time Systems : WebSockets, Live Streaming, Event-Driven Systems

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt. Ltd.

Aug 2023 - Present

Full Stack LLM Developer

Hyderabad, India

Client: Phillips 66 (P66)

- Developing enterprise applications and AI-driven platforms for the Oil & Gas domain using Angular (TypeScript), Django, FastAPI, PostgreSQL, and Redis.
- Building scalable REST APIs and microservices with Django & FastAPI, following best practices and clean architecture.
- Designing and optimizing database schemas, writing complex SQLAlchemy ORM queries and stored procedures for high-performance.
- Creating real-time dashboards with 24/7 operational monitoring, live charts, and KPI dashboards for operations and analytics.
- Implementing Redis caching, WebSockets and event-driven systems for live data updates and streaming logs.
- Collaborating with cross-functional teams in an Agile environment to deliver end-to-end solutions.
- Troubleshooting and debugging issues, reducing production bugs to under 20% and ensuring high application reliability.
- Recognized with Best Performance Award (2025) for outstanding contribution, ownership and timely delivery.
- Mentoring freshers, guiding new team members and leading development activities during team lead absence.

KEY PROJECTS

AI Central - Enterprise AI Platform (Angular, Django, PostgreSQL, Redis, LLM)

- Built an enterprise conversational AI platform enabling users to ask queries and get insights globally.
- Engineered custom AI agents, real-time streaming logs and prompt engineering workflows.
- Architected secure, scalable backend APIs and responsive UI for enterprise-level usage.

MYRA Workflows - AI Workflow Automation (Angular, Django, PostgreSQL, Redis)

- Created an AI-powered workflow builder to design, schedule, and run multi-step workflows without manual intervention.
- Enhanced live execution tracking, automated task orchestration and risk monitoring.
- Integrated Redis-based streaming logs and scheduling for reliable workflow executions.

Aviation - Procurement & Bidding Platform (Angular, FastAPI, PostgreSQL, WebSockets)

- Implemented RFP registration, bid creation and contract management platform for aviation fuel.
- Delivered WebSocket-based real-time chat for collaborative cost validation and negotiation.
- Designed scalable FastAPI services and optimized PostgreSQL data models for transactional operations.

My Operations - Real-time Operations Dashboard (Angular, Django, PostgreSQL, Redis)

- Built real-time operational dashboards to track refinery losses, profit metrics and KPIs with live charts.
- Integrated Redis for live data streaming and built high-performance backend APIs. Enabled 24/7 monitoring for loss reduction.

CERTIFICATIONS

- Generative AI Certification
- Claude AI Architecture
- Accenture Internal Trainings

EDUCATION

Bachelor of Technology (Computer Science Engineering)
Sri Mittapalli College, JNTUK
2019-2023 | CGPA: 7.49

ACHIEVEMENTS

- Reduced production bugs to **under 20%** through rigorous testing, debugging and code quality improvements.
- Optimized **API response time by 20-30%** by improving queries, indexing and caching.
- Designed **24/7 real-time dashboards** for operations monitoring with live data streaming.
- Strong **debugging & troubleshooting** skills leading to faster issue resolution and minimal downtime.
- Recognized multiple times for delivering high-quality solutions within deadlines and mentoring new team members.
